Muhammad Uzair

Principal Consultant — Power Platform Solution Architect

Lahore, Pakistan | +92-311-2983500 | uzairsuleman786@gmail.com | linkedin.com/in/muhammaduzairsuleman

PROFESSIONAL SUMMARY

Microsoft Certified Power Platform Solution Architect (PL-600) and Developer (PL-400) with 5+ years of experience designing and delivering enterprise-grade solutions across the Microsoft Power Platform and Dynamics 365 CRM ecosystem. Proven track record of architecting scalable, AI-driven applications and automation for clients in the UAE, US, UK, and Canada. Deep expertise spanning the full Power Platform stack — Canvas Apps, Model-Driven Apps, Power Pages, Power Automate, Copilot Studio, Dataverse, AI Builder, and Azure AI Foundry — complemented by strong integration and ALM capabilities. Recognized for translating complex business requirements into robust, governed, and production-ready solutions.

CORE COMPETENCIES

Power Apps	Canvas Apps, Model-Driven Apps, PCF Controls, Component Libraries, JS Customization
Power Pages	Portal Development, Liquid Templates, Web Roles, Web API Integration, Authentication Setup
Power Automate	Cloud Flows, Scheduled Flows, Business Process Flows, Approval Workflows, Custom Connectors
Copilot Studio	Chatbot Design, Azure OpenAI Integration, Multi-Channel Deployment (Teams, WhatsApp, Web)
Dataverse	Data Modeling, Security Roles, Table Relationships, Business Rules, Data Migration (SQL, SharePoint)
AI Builder	Form Processing, Object Detection, Text Classification, Integration with Power Automate
Azure AI Foundry	Azure OpenAI Service, Prompt Engineering, AI Model Integration with Power Platform
Power BI	Report Development, Dashboard Design, Dataverse Integration (supporting role)
Dynamics 365 CRM	Customer Service, Sales, Field Service, Case Management, SLA Configuration, Entity Customization
Integration & APIs	REST APIs, Azure Functions, Custom Connectors, FetchXML, OData, META API, RingCentral, Agiloft, SAP, ServiceNow, Ccure
Dev Tools	C#, .NET Core, JavaScript, React, HTML, CSS, Git, Azure DevOps, Power Platform CLI
ALM & Deployment	GitHub Actions, Octopus Deploy, Power Platform Build Tools, Solution Packaging, Env. Management (Dev / SYS / UAT / Prod), Jira (Agile/Scrum)

PROFESSIONAL EXPERIENCE

Systems Limited *January 2023 – Present*

Principal Consultant — Power Platform Solution Architect | *January 2026 – Present*

Senior Consultant — Power Platform & D365 CRM | *November 2023 – December 2025*

Consultant — Power Platform & D365 CRM | *January 2023 – October 2023*

Hawaiian Electric — CID & CIT Portals (US — Energy & Utilities)

- Architecting and delivering CID (Customer Information & Data) and CIT (Customer Interaction & Tracking) portals for one of Hawaii's largest electric utility providers, supporting thousands of customer interactions.

- Designed multi-stage approval workflows in Power Automate with escalation logic, role-based routing, and a full compliance audit trail meeting utility-sector regulatory requirements.
- Integrated Power Pages portals with SAP to synchronise customer master data and service records bidirectionally, eliminating manual data re-entry across enterprise systems.
- Implemented DocuSign e-signature integration within portal workflows, enabling legally binding digital agreements for customer contracts and service authorisations.

IAM — Sponsor Onboarding Portal (Enterprise Identity & Access Management)

- Built a full-cycle Sponsor Onboarding Portal on Power Pages, managing sponsor registration, verification, and access provisioning within a large enterprise IAM ecosystem.
- Designed Power Automate flows orchestrating multi-tier approval chains with automated notifications, SLA tracking, and exception-handling at each stage.
- Delivered complex enterprise integrations connecting the portal with SAP (HR and vendor master data), ServiceNow (IT service requests and ticketing), and CCure (physical access control), creating a unified, end-to-end digital onboarding pipeline.

Arrowhead Pharmaceuticals — Contractor Onboarding Agent (US — Life Sciences)

- Built an intelligent Copilot Studio agent deployed in Microsoft Teams that guides users through a structured contractor onboarding conversation, validating inputs and saving verified records to Dataverse.
- Engineered a Power Automate approval workflow that, upon final sign-off, automatically triggers a live REST API call to the Agiloft contract management system to verify and activate contractor credentials.
- Eliminated manual contractor verification steps and email-based coordination, significantly reducing onboarding cycle time for HR and legal teams.

iBasis — AI-Powered NDA Comparison & Analysis Automation

- Developed an end-to-end automation that ingests NDA documents, compares clauses across multiple agreements using Azure AI Foundry (Azure OpenAI), and surfaces AI-generated recommendations highlighting deviations, risks, and items requiring legal review.
- Integrated Power Automate with Azure OpenAI to perform intelligent contract comparison at scale, enabling legal teams to review complex NDAs in a fraction of the time previously required.

Beazley Insurance — Multiple Engagements (UK & Canada — Specialty Insurance)

- Exposure Management Portal: Built a Power Pages portal integrated with SharePoint via Power Automate, enabling real-time tracking of exposure data with automated workflow notifications and a full audit history.
- BookSmart App: Developed a Canvas App that captures structured user commentary and feeds it directly into Power BI reports, allowing business stakeholders to annotate and contextualise live insurance data without manual handoff.
- Risk Assessment Portal: Delivered a Power Pages portal with dynamic, rule-based scoring logic in Power Automate, enabling underwriters to evaluate and quantify risks based on user-submitted data in real time.
- Gift & Hospitality Automation: Automated the declaration and approval process using SharePoint and Power Automate, replacing a manual approval chain with a fully governed, auditable digital workflow that meets FCA regulatory obligations.
- Share Dealing Platform: Designed a Power Pages portal using Web API, FetchXML, and role-based page content with multi-level approver workflows enforcing financial regulatory controls.
- C&P HR Chatbot: Built a Copilot Studio chatbot integrated with Azure OpenAI to handle employee HR queries across channels, measurably reducing HR service response times.
- Rational Document Generator: Created a Canvas App connected to Dataverse, automating on-demand production of complex structured insurance documents.
- Won the internal Hackathon 2025 at Beazley for delivering an innovative Power Platform solution with demonstrable business impact.

Emirates Group (UAE)

- Designed best-fit Power Platform architectures aligned to enterprise governance and security standards, translating business requirements into governed, scalable solutions.
- Delivered a Business Card application on Power Pages and a companion Mobile Alerts Canvas App, both promoted to production through a governed ALM pipeline.

VSI — Azure OpenAI Integration Pre-Sale Product (In-House)

- Integrated Azure OpenAI into Microsoft Teams and WhatsApp via Copilot Studio and Power Automate, delivering intelligent multi-channel AI for enterprise client demonstrations.
- Built a fashion-advisory chatbot using Bot Framework SDK connected to Azure OpenAI and third-party product APIs, deployed as an Azure App Service.

Imperium Dynamics

March 2022 – January 2023

Software Engineer II | *September 2022 – January 2023*

Software Engineer I | *March 2022 – August 2022*

GhanemForwarding LLC (US — Logistics)

- Led end-to-end migration of a legacy SQL database to Dataverse, including schema design, relationship mapping, and data transformation scripts.
- Developed a Model-Driven App with custom forms, views, business rules, JavaScript customizations, and Business Process Flows to support logistics operations.
- Built Cloud Flows integrating SharePoint, Excel, Outlook, Magaya (shipment tracking via Custom Connector), and RingCentral (SMS via HTTP) to automate freight workflows.
- Trained and deployed AI Builder models for document processing of individual shipment carrier documents, integrated directly into automation flows.
- Developed a Power Pages portal frontend using HTML, CSS, and JavaScript with a WebAPI/OData/FetchXML backend, deployed from UAT to Production.

Imperium Hourly — Employee Hours Tracking (In-House)

- Built a Model-Driven App to track employee working hours and dynamically calculate payment rates based on configurable rate cards.

Dubai Islamic Bank Pakistan

March 2021 – March 2022

Analyst Programmer

- Developed backend REST APIs and middleware services in .NET Core for RAAST (Pakistan's first instant payment system), supporting real-time fund transfers and core banking transactions.
- Built an ASP.NET OTC (Over The Counter) branch application to enable RAAST operations at bank branches, allowing customers to transfer funds and open accounts in person.
- Developed .NET Core middleware APIs for the Roshan Digital Account (RDA) mobile and web platform, facilitating full core banking integration for Non-Resident Pakistanis.
- Delivered REST API middleware for DIB Pakistan Mobile App, Digital Onboarding, ATM Host transactions, international/local SMS gateway, and NADRA identity verification integration.

The Next Rex (Pvt) Limited

December 2020 – March 2021

WordPress Developer Intern

- Developed dynamic and e-commerce websites, customised WordPress themes, and optimised site performance as part of an internship engagement.

EDUCATION

Bachelor of Science in Computer Science (BSCS) *2016 – 2021*

Bahria University, Karachi Campus | CGPA: 3.10

CERTIFICATIONS

Microsoft Certified: Power Platform Solution Architect (PL-600)
Microsoft — Issued 2025
